

56 th CRC Seminar

Mark deBoer 氏

岩手大学国際交流センター

今回の CRC セミナーでは、Mark deBoer 氏に岩手大学が行っている英語（で、または、の）教育システム（ICT Contents） project について概説いただき、講義での利用方法に関する実践的な講演をお願いしました。ご興味のある多くの皆様のご参加をお待ちしています。

Using the ICT contents program: usability and mobility

時間：2011 年 12 月 9 日（金）15:30～16:30

場所：総合教育研究棟（生命系）1 階 遠隔講義室

The ICT Contents project is a project to develop an English curriculum base for the different faculties of Iwate University. Using an on-line system, the ICT Contents Project contains a database of specialized English lesson content that can be used in the classroom or for student self study. In this seminar, I will discuss how the ICT Contents program is set up, how to use it for your own courses and I will show how easy it is to use from anywhere with web access. I will take you through the courses that have already been set up in the system and show you how easy it is to set up course that is tailored to your exact needs for each course that you teach. Also, I will outline different tools in the ICT contents program, show how each is used and give you some guidelines on how easy the system is to use with minimal knowledge and time. I also offer full support in helping you set up your courses and I will show you the kinds of steps that are needed to provide that support.
